ClearMomentum, Inc., a developer of CPM, Corporate Performance Management software and services announced the release of version 6.0 of the company's flagship application ClearFinancials®.

The most recent release provides users with the ability to configure reports with unlimited flexibility and is designed to provide deep insight into the most complex organizational structures. New drag and drop report writing functionality combined with the ClearFinancials® data model makes complex report writing both efficient and user friendly. This banded report writer allows users to report or query ClearFinancials® data or aggregate data sourced from disparate data sources or operating systems. New features include advanced charting and sub-reporting to facilitate analyst commentary and to support the need to consolidate key management information into one report.

In addition, ClearFinancials® now supports the ability to drop "Public" reports in shared folders to make specific data available to key stakeholders and other user groups for the efficient distribution of critical performance data.

Version 6.0 includes a host of general usability enhancements including drill down visibility from top level financial statements down through to general ledger accounts including those operating with multiple divisions, operating units, profit centers or multiple currencies.

ClearMomentum provides executive managers and capital providers with a Corporate Performance Management (CPM) solution that integrates financial strategy with business analytics, modeling, budgeting and is rapidly becoming the industry Gold Standard for transparent financial reporting. The solution provides an unmatched user experience delivered SaaS and can be deployed across the enterprise efficiently and cost effectively.
